DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a pattern dyeing process, classified in class 8, subclass 485.
- II. Claims 19, 20, drawn to coated articles, classified in class 428, subclass 96.
- III. Claims 21-24 and 26, drawn to coating process, classified in class 427, subclass 389.
- IV. Claims 25 and 27, drawn to coated articles., classified in class 428, subclass 96

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process such as by coloring with a composition comprising said stainblocker instead of in two separate steps as claimed. The same reasoning applies to the relationship between groups III and IV.

Groups I and II are a distinct process and product from groups III and IV because groups I and II require a substrate comprising two different types of yarn while the substrate of groups III and IV is a single type of yarn, that is, acid dyeable nylon.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the other Groups, restriction for examination purposes as indicated is proper.

A telephone call was made to George Medwick on May 6th to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
